

# Cleantech Practice

We are an experienced, well-connected pan-Canadian team ready to invest in impactful technologies.

Collaboration is central to our approach: we invest in partnership with public and private sector investors, to build Canada's cleantech/climate tech ecosystem.

This sector will play a critical role in helping Canada reach its 2030 and 2050 climate targets.

## Cleantech Fund

(as at Sept 30, 2023)

**\$600M**  
fully committed

**2018**  
launch year

**50**  
portfolio companies

## Impact

We help develop technology champions. While our Cleantech Fund portfolio companies are just starting to scale, early metrics already speak to the impact they are making:

\$1.4B cumulative annual revenues vs. \$632M at time of first investment

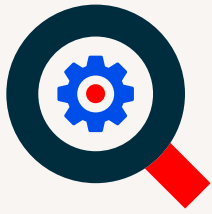

\$244.34M of cumulative proceeds since inception (2018 to September 2023)

For every \$1 that we committed, \$7.3 has been raised in additional funding from the private sector by our portfolio companies

**+88%**  
export

**+\$290M**  
in R&D expenditures

**+2,800**  
patents granted

**+1,200**  
IP applications

## Climate Tech Fund

**\$400M**

**2022**  
launch year

**7**  
portfolio companies

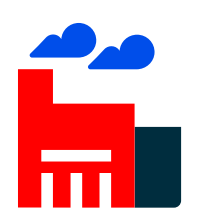

We invest in climate tech firms with technologies that:

Accelerate the net-zero transition for Canada's key sectors, including energy, mining, forestry, agriculture, transportation, waste and built environment

Upgrade Canada's natural resources such as critical minerals into high-value products

Help fortify Canada's low-carbon supply chains
